SEED COMPANY

SHERIDAN, WYOMING

This Year, as
Never Before

PRODUCE for VICTORY

TO OUR FRIENDS AND CUSTOMERS:

In common with those engaged in all branches of agriculture, the seedman's responsibility in War Time is greatly increased. To meet this responsibility and be of maximum service to our Farmers, Ranchers and Victory Gardeners is our highest aim.

That our job under present conditions is not easy will be recognized by all who are having troubles of their own. However, we have the benefit of nearly twenty years experience in the seed business in Wyoming. That benefits both you and us, because our knowledge of source of supply enables us to secure stocks that are not readily obtainable, and our familiarity with farm and garden practices in this region enable us to correctly advise you on your own planting problems.

ABOUT GUARANTEE

We have used every possible care to secure seeds that are true to name, carefully selected, and all lots are tested thoroughly for both germination and purity. Owing to so many conditions beyond the control of either the seedsman or planter, however, we give no warranty, express or implied, as to the productiveness of any seeds we sell and we will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the seed.

NORTHERN SEED COMPANY.

WYOMING SALES TAX

The Wyoming Selective Sales Tax Law exempts feeds only "for use in feeding livestock or poultry for marketing purposes." It also exempts "all sales of seeds, roots, bulbs, small plants and fertilizer planted or applied to land, the products from which are to be sold."

Feed, seed, etc., other than for the above purposes is therefore taxable, as are all supplies, garden tools and miscellaneous articles which we handle. Wyoming customers will please add 2% to the amount of their orders for such items to cover this tax. Mail orders to be shipped outside of the state are not subject to Wyoming Sales Tax.

VEGETABLE SEEDS

There must be no relaxation in "Victory Gardens" this year. This is true, both from the National viewpoint, and for our own individual welfare, as evidenced by the return to rationing of many canned vegetables. It is up to every one of us who has some tillable soil to plant a garden, large or small according to our ability, and produce food. Every little bit helps, you and Our Boys too.

As always, we supply only seeds that are well adapted to our climate. All seed is tested for germination and purity, and selected from reliable sources to insure trueness to name and variety.

No items on which ceiling prices are established are priced at over that figure, and due to careful buying we are able to offer many varieties at below ceiling price.

Vegetable varieties which yield highest quality frozen products are marked with asterisk*.

Nursery Stock

Although we have sold our Fairacres Nursery and are no longer growing any stock locally, we can still supply you with high quality dormant stock secured from strictly reliable growers. We will have on hand at planting time a good variety of fruit trees, and ornamental shrubs. Other items not carried in stock can be obtained for you if ordered early. Wholesale nursery growers are having plenty of troubles due to labor shortage, and many items cannot be secured.

GUARANTEE

We guarantee all items of nursery stock to be alive and in first class condition, capable of growing if properly cared for when they leave our hands. Because we cannot be responsible for weather and other conditions beyond our control, we cannot guarantee nursery stock after it is planted.

DELIVERY

All stock listed in our catalog will be delivered free by parcel post to points within 300 miles of Sheridan. All items for Sheridan can be delivered on our regular once-a-day delivery. To points beyond the 300 mile zone, nursery stock will be sent by the cheapest fast delivery, charges collect.

DISCOUNT

A discount of 5% will be made on orders totaling \$10.00 or more.

LAWN GRASS SEED

KENTUCKY BLUE GRASS—Extra quality seed, 23 lbs. per bu. weight. 55c per lb.; 5 lbs. or more 50c per lb.

MOUNTAINEER LAWN MIXTURE: A mixture of grasses and clover that has become very popular with our trade. Many fine lawns in Sheridan have been started with this mixture. 60c per lb.; 5 lbs. or more 55c per lb.

SHADY LAWN MIXTURE—A good mixture for shady lawns. 60c per lb.; 5 lbs. or more 55c per lb.

WHITE DUTCH CLOVER—Fancy grade. \$1.10 per lb.; 5 lbs. or more @ \$1.05 per lb.

ALFALFA AND CLOVERS

ALFALFA—This crop needs no description in our great producing area. All our stocks are local grown and therefore the hardiest strains. Our Cossack, Ladak and Grimm lots are selected from fields that were planted with State Registered seed. If you plan on growing Alfalfa for seed, be sure to plant top grade pure tested seed. Quality pays dividends in seed growing.

Price: 50 lbs. or more at \$46.00 per cwt. Less than 50 lbs. @ 47c per lb.

RED CLOVER—A valuable crop, usually sown in mixture with Timothy. Some farmers are finding it a profitable crop to raise for seed. Our stock is hardy local grown, extra fancy.

Price: 50 lbs. or more @ \$40.00 per cwt. Less than 50 lbs. @ 41c per lb.

ALSIKE—Thrives best in moist soils. Good in both meadow and pasture mixtures. Does not bloat stock.

SWEET CLOVER—Do not overlook the possibility of Sweet Clover pastures. Use in mixtures of grasses on dry land to make crop till grasses become established. Also use for irrigated pasture on land that you wish to cultivate again in two or three years. A wonderful soil builder. We have both Yellow and White Blossom.

Price: 50 lbs. or more @ \$16.00 per cwt. Less than 50 lbs. @ 17c per lb.

GRASS SEEDS

A big problem in Wyoming is the improvement of our much needed grass lands. This is a very much neglected phase of the development of our natural resources. To know your grasses and which is best adapted to certain moisture and soil conditions is of vital importance to the progress of the cattle and sheep industry of this area.

We of the Northern Seed Company have been studying this subject and watching the progress that many ranchers and farmers are making in a program for providing better winter range and summer pasture. Keep this in mind when planning your seeding program, and make use of our long observation and experience.

When buying our stock of grass seeds, which with the exception of a few varieties are not grown for seed in this territory, we purchase only seed that quickly becomes acclimated to our high altitudes and severe winters.

We list the following varieties that have proven their worth. We have what we believe to be ample stocks arranged for, but offer all Grass Seed subject to change in market price and stock on hand. Prices FOB Sheridan, bags included.

BROME GRASS—Much can be said for Brome. It makes a prolific growth in early spring, even during cold weather. It will stand more drought than many grasses. Grows at all seasons from early spring to late fall with reasonable moisture. Plant a few pounds per acre in your alfalfa meadow and let it propagate instead of cheat grass as the alfalfa stand gets thinner. We offer Canadian grown seed.

Prices: 50 lbs. or more @ \$25.00 per cwt.; 10 to 49 lbs. @ 26c per lb. Less than 10 lbs. @ 28c per lb.

ORCHARD GRASS—Excellent in a pasture mixture, also planted with alfalfa as it matures early and makes best hay cut as early as first cutting alfalfa. Also comes back to make a good second growth with second cutting alfalfa (on irrigated fields).

Prices: 50 lbs. or more @ \$47.00 per cwt.; 10 to 49 lbs. @ 48c per lb.; less than 10 lbs. @ 50c per lb.

KENTUCKY BLUE GRASS—With plenty of water during the hot months of July and August, no grass will pasture as much stock as this. Excellent in pasture mixtures for this purpose. Blue Grass tends to become sodbound, keeping moisture from going through to the base of the root system. Light cultivation will increase its productiveness.

Prices: 50 lbs. or more at \$43.50 per cwt.

RED TOP—This will do well in soil too wet for most grasses.

Prices: 50 lbs. or more at \$27.50 per cwt.; 10 to 49 lbs. @ 29c per lb.; less than 10 lbs. @ 31c per lb.

TIMOTHY—Perhaps the biggest producing perennial grass grown for hay in Wyoming. Timothy, with a small percentage of Alsike or Red Clover added makes an abundance of hay relished by stock. Ideal to take range stock through bad storms. One advantage of timothy is that range stock will eat it, and still eat dry range grass as part of their ration.

Price: 50 lbs. or more @ \$13.00 per cwt.; 10 to 49 lbs. @ 14c per lb.; less than 10 lbs. @ 15c per lb.

MEADOW FESCUE—Also known as English Blue Grass. Similar to Kentucky Blue Grass, but grows larger and coarser. Desirable in pasture mixtures, as it is very hardy and stands drought well. Can be used for lawns where water is not available for thorough watering or irrigation.

Price: 50 lbs. or more at \$35.00 per cwt; 10 to 49 lbs. @ 36c per lb.; less than 10 lbs. @ 38c per lb.

HUNTLEY PASTURE MIXTURE—Famous for irrigated pasture that will grow a maximum of feed throughout the growing season, and late into the fall season. Consists of 20% each Brome Grass, Meadow Fescue, Orchard and Kentucky Blue Grass, and 10% each of Alsike and White Dutch Clover.

Price: 50 lbs. or more @ \$43.00 per cwt; 10 to 49 lbs. @ 44c per lb.; 10 lbs. or less @ 46c per lb.

MOUNTAINEER PASTURE MIXTURE—A formula we have sold for many years. Contains 25% Brome, 15% each of Meadow Fescue, Orchard and Kentucky Blue Garss, 10% Timothy, 13% Alsike and 7% White Dutch Clover.

Price: 50 lbs. or more at \$38.00 per cwt.; 10 to 49 lbs. @ 39c per lb.; 10 lbs. or less @ 41c per lb.

We can mix grasses and clovers on any formula you desire, and will be glad to make recommendations for special mixtures to meet individual soil or moisture conditions.

CRESTED WHEAT GRASS—The hardestiest and most drought resistant of the cultivated grasses. Makes excellent hay or pasture, and will grow in places other grasses will fail.

Price: 50 lbs. or more @ \$19.00 per cwt.; 10 to 49 lbs. @ 20c per lb.; less than 10 lbs. @ 22c per lb.

As a general rule, best stands can be secured by sowing grass seed on a firm seed bed early in the spring.

FORAGE CROPS

SUDAN GRASS produces an abundance of good quality hay and a fine summer pasture. With ideal conditions Sudan will make two crops of hay in a season. Needs a fair amount of moisture to sprout the seed but will stand much drought and grow best in the hottest part of summer. A good crop to give you that extra feed for winter.

PROSO or HOG MILLET a good late crop for hay or grain feed. Grain is high in fat contents and an excellent poultry feed used in mixtures with other feeds. Colors vary from yellow to creamy white. (We also have the Early Fortune or Red variety).

SIBERIAN MILLET one of the best varieties of millet for a hay crop. Cut at the proper time and well cured makes a good green hay. Relished by dairy cows. Solid type heads and a smaller seed than the Proso.

All varieties of millet are considered among the best crops to use in choking out weeds. Given an even start and planted thick will make a fast growth and keep weeds from seeding.

RAPE SEED—A few pounds planted with grain makes a good early fall pasture for cattle, hogs and sheep after the grain crop has been harvested. Price: FOB Sheridan, per lb. 22c; 5 lbs. or more @ 20c per lb.

Ask for prices on forage crops.

CORN

KINGSCROST HYBRID—In making your selection of a hybrid corn it is very important that you select a hybrid that has proven itself in your particular area. There are many hybrids for the corn belt but few that will mature in our high altitudes and short season. KINGSCROST KE2 85-day Yellow Dent has proved that it has what it takes for Northern Wyoming and Southern Montana. As early as any straight Yellow Dent. Prices: Kingscrost Hybrid, \$9.50 per bu., FOB Sheridan.

FALCONER SEMIDENT—In trial plots with the hybrids corn Falconer shows it is the best of the open pollinated for a short season at high altitude.

GEHU FLINT—For an early maturing corn that can be planted late in the season and still mature. Ideal for early fall hog feed.

Ask for prices on Seed Corn.

SEED GRAINS

High quality seed grain, well cleaned, free of weeds and tested for purity and germination, may cost a few cents per hundred more at planting time—but at harvest time you get your money back, many times over.

We will have ample supplies of grain in the following varieties. As this is written, we are unable to quote exact prices, but from purchases already made and stocks which we know to be available, are sure that we will be able to take care of your requirements at reasonable figures.

SPRING WHEAT—

Marquis. This needs no introduction, as it has been the main standby for many years.

Thatcher. Has proved its value beyond doubt as a stem rust resistant variety. It has high protein content and is excellent milling quality.

BARLEY—

Trebi. A heavy yielding barley, grown here for many years. Six row type, with barbed beards.

Sparton. A comparatively new variety which has proven its worth, especially on dry land. Two row type, thin hull, smooth beard, heavy plump grain, even with little moisture. Will not yield as heavy on irrigated land as the four and six row types.

OATS—

Markton. Highly recommended for dry land. Medium size, good weight, early maturing.

Victory. Mid-season oat with plump heavy grain. Good yielder. Our stock of this variety weighs 45 lbs. per bushel.

Vicland. A new variety. Rather small kernels of heavy test weight. Short stocky straw, which enables it to stand when other oats lodge.

RYE—

Rosen. Winter rye can be sown as a nurse crop with pasture mixture and will make an abundance of pasture before grasses become established. A good crop on either irrigated or dry land.

SEED POTATOES

We will have local grown CERTIFIED BLISS TRIUMPH Seed Potatoes, also good quality non-certified stock. Prices will depend on market at planting time. Ask for prices. Treat all seed potatoes with Semesan-Bel.

DU-BAY SEED DISINFECTANTS

CERESAN—New Improved—for grain treatment. 4 oz. can, 30c; 1 lb. can, 80c; 4 lb. can \$2.70. One pound treats 32 bushels.

SEMESAN JR.—For seed corn. 2 oz. pkg. 15c; 4 oz. pkg. 25c.

SEMESAN BEL—For seed potatoes. 2 oz. pkg. 30c; 1 lb. can \$1.65; 5-lb. can \$7.15. One pound treats 60 to 80 bushels.

SEMESAN—For vegetable seed and “damping off.” $\frac{1}{3}$ oz. pkg. 10c; 2 oz. pkg. 40c.

It pays dividends to treat your seed with the proper Du-Bay Disinfectant.

INSECTICIDES

Liquid Lime Sulphur used as a dormant spray at the rate of one part Lime Sulphur to eight parts of water applied to your fruit trees, especially apple trees, will save you much time and labor later in the season to get rid of aphids. Spray before the buds appear in early spring with above solution as this is strong enough to kill the eggs. Do not use a solution of this strength after the buds appear as the strength of this mixture will burn and blister tender foliage. Nice days in March is the ideal time for dormant sprays of this sort.

All prices are F. O. B. Sheridan

Northern Special Calf Meal is a blend of ingredients high in protein mixed to take the place of the cream in milk. Excellent for skim milk fed calves. Mix one table spoon in a feed of skim milk for small calves and increase to not over two rounding table spoon for larger calves. After calves are large enough to consume a greater amount of feed than the amount mentioned above they are large enough to eat grain. A small amount of calf meal in skim milk plus grain gives best results.
